1. **Letter of Invitation**

New Delhi

03rd August 2018

1.1. **Introduction**

The Sagarmala Programme is an initiative by the Government of India under the Ministry of Shipping to address the challenges and leverage the potential of India’s extensive coastline through port-led development. The Sagarmala Programme was approved by the Union Cabinet in March 2015. The vision of Sagarmala Programme is to reduce the logistics cost for both domestic and EXIM cargo with minimal infrastructure investment.

The Sagarmala Programme will focus on four pillars of development, namely:

a. **Port Modernization & New Port Development**: Transforming existing ports into world class ports through capacity augmentation, modernization of port infrastructure and improving operational efficiency of the ports. Development of new ports is also envisaged as part of this objective

b. **Port Connectivity for efficient evacuation**: Improving port evacuation and connectivity to the hinterland and developing optimal multi-modal logistic solution for efficient, cost effective movement of cargo and to harness the potential of inland waterways / coastal shipping

c. **Port-led Industrialization**: Undertaking development of Coastal Economic Zones with projects like port based industrialization, coastal tourism, logistics parks etc. and aligning with the ‘Make in India’ initiative. Port based industrialization will include development of port based industrial parks, promoting captive industries and ancillary facilities and covering ship building / repair and other maritime related industries

d. **Coastal Community Development**: Sustainable development of coastal communities through skill training programs, development of coastal tourism, fisheries and other activities.

As part of the Sagarmala Programme, a National Perspective Plan, for the comprehensive development of India’s coastline and maritime sector has been prepared and includes more than 400 projects across the areas of Port Modernization & New Port Development, Port Connectivity Enhancement, Port-led Industrial Development and Coastal Community Development.

Implementation of the projects identified under National Perspective Plan, will be taken up, starting FY 16-17, by the respective Ports, State Governments / Maritime Boards, Central Ministries, mainly through private or PPP mode. Sagarmala Development Company Limited (“SDCL”) has been set up by Ministry of Shipping to provide equity support to the project SPVs and funding support to residual projects.

**Background of the assignment:**

Kakinada Anchorage Port has established itself as a key port on the east coast of India with a capacity to handle 4 million metric tons per annum of cargo. About 1.96 million metric tons of cargo has been handled during FY 2016-17 contributing to revenue of INR 19.74 crore to the Government. In spite of low-mechanization facilities, the Anchorage Port has been a major revenue earner among the Ports of Andhra Pradesh. The Port has earned revenue in the range of INR 19.00 – 27.00 Crores every year over the last five years. The Port also compares well with other highly developed private ports under the State Government.

Sagarmala Development Company Limited
The Port is a major employment generator in the region providing direct employment to approximately 10,000 persons and nearly 30,000 – 50,000 persons being indirectly dependent on the Port for their livelihood.

**Status of Port Infrastructure**

Existing port infrastructure such as wharves, godowns, roads, dredging and groynes are at optimum utilization levels. The cargo transportation channel i.e. commercial canal (being used by barges) of 7 km requires capital dredging in view of introduction of larger barges and siltation of the channel.

Furthermore, additional works such as increasing the draft of the channel and construction of new wharves need to be undertaken. The present infrastructure is over 25 years old and these facilities have witnessed only minor maintenance works since then. Due to heavy truck loads because of increasing traffic at the port every year and due to the effect of coastal weather, these facilities are now in a dilapidated condition. Most of these facilities require immediate attention for their continued service.

Customers of the Port have been consistently presenting their concerns for upgradation of infrastructure at the port and have also presented their views to the Govt. in various forums. Existing port infrastructure has achieved maximum utilization levels and there is a need for significant infrastructure upgradation at the port in view of the immense cargo potential in the region.

**Cargo potential for the Port:**

The State Government has drawn ambitious plans for the development of Visakhapatnam to Kakinada Industrial Corridor as a result of which Kakinada is expected to emerge as very key industrial zone. The natural port is strategically located to serve several major industrial parks and SEZs. The region is poised to become investment hub for Chemicals, Petroleum and Petrochemicals products. This is expected to drive further demand for cargo handling at the Port.

Furthermore, the Central Government’s significant focus on enabling coastal shipment is likely to generate an additional volume of 3 – 4 million metric tons per annum of coastal volume at the Port, over the next few years. The Port also lends itself to a unique feature i.e. direct connectivity to a National Waterway (NW-4) which will enable seamless cargo movement between the Port and key industrial regions in AP including Vijayawada / AP Capital Region, among a total of six districts. Due to the potential for large scale low-cost cargo transportation via NW-4, the Port is well positioned to draw disproportionate cargo volumes over the next few years.

In view of the above and with the objective of modernizing infrastructure at the port, a review has been carried out of the existing facilities at Kakinada Anchorage Port by the Port Department, Government of Andhra Pradesh and infrastructure gaps have been identified. Hence, upgrading the existing infrastructure at Kakinada anchorage port is the need of the hour. A pre-feasibility study was undertaken by the Port Department, Government of Andhra Pradesh with the aim of identifying critical infrastructure requirements and the preliminary costs associated with such infrastructure development.

The Indian Ports Association, Ministry of Shipping has decided to undertake the “Improvement of Kakinada Anchorage Port Facilities” under Sagarmala Programme.

Sagarmala Development Company Limited (hereinafter referred to as “SDCL” or “Client”) invites proposals to undertake this assignment:

Ongoing projects can be submitted with detail of progress supported by suitable documents. Only projects which have been completed more than 80% and payments have been received partially / completely will be considered for evaluation. The Applicant shall provide completion certificate issued by Client for the completed projects or for projects with more than 80% completion. The
Applicant can also provide Work Order or Contract Agreement along with payment receipts verified by the Applicant’s Statutory Auditor specifying that more than 80% of the total professional fees has been received by the bidder for the project.

The technical score ($S_t$) will be calculated as follows:

$$S_t = \text{Sum of the score obtained in each of the sub-categories mentioned in table of clause 2.9.5 (not exceeding 100)}$$

The minimum technical score required to qualify technical evaluation is **70 Points out of 100.** A proposal will be considered unsuitable and will be rejected at this stage if it does not respond to important aspects of the RFP Document and the Terms of Reference or if it fails to achieve the minimum technical score. The Client will notify Applicants who fail to score the minimum technical score about the same and return their Financial Proposals unopened after completing the selection process.

2.9.6 The Client will notify the Applicants who secure the minimum qualifying technical score, and become eligible for second stage of evaluation i.e. financial proposal evaluation, indicating the date and time set for opening the Financial Proposals. The notification would be displayed on the Central Public Procurement Portal and sent by email to all qualifying Applicants only.

2.9.7 **Financial Proposal Evaluation:** In the second stage, the financial evaluation will be carried out. Each Financial Proposal will be assigned a financial score ($S_f$) as specified in Clause 2.9.9

2.9.8 For financial evaluation, the total cost indicated in the Financial Proposal, as per Form 4B of Section 4, will be considered.

2.9.9 The Authority will determine whether the Financial Proposals are complete, and unconditional. The total cost of services and should be stated in INR only. In case of any discrepancy in the financial quote between figures and words, the amount mentioned in words shall be treated as final. The cost indicated in the Financial Proposal shall be deemed as final and reflecting the total cost of services. Omissions, if any, in costing any item shall not entitle the Applicant to be compensated and the liability to fulfil its obligations as per the TOR within the total quoted price shall be that of the Applicant. The lowest Financial Proposal ($F_m$) will be given a financial score ($S_f$) of 100 points. The financial scores of other proposals will be computed as follows:

$$S_f = 100 \times \frac{F_m}{F}$$

($F =$ amount of Financial Proposal of the applicant; $F_m =$ amount of the lowest financial bid)

2.9.10 **Combined and Final Evaluation:** Proposals will finally be ranked according to their combined technical ($S_t$) and financial ($S_f$) scores as follows:

$$S = (S_t \times T_w) + (S_f \times F_w)$$

Where, $T_w$ and $F_w$ are weights assigned to Technical Proposal and Financial Proposal respectively as mentioned in the Data Sheet.

2.9.11 The Selected Applicant shall be the Applicant having the highest combined score. The second highest Applicant shall be kept as reserve and may be invited at the discretion of the Authority for negotiations in case the first-ranked Applicant withdraws or fails to comply with the requirements mentioned in this RFP.

### 2.10. Negotiation

2.10.1 The selected applicant may, if necessary, be invited for negotiations. The negotiations shall generally not be for reducing the price of proposal, but will be for re-confirming the obligations of
the consultant under this RFP. Issues such as deployment of key personnel, scope of work, methodology and quality of work plan shall be discussed during negotiations. In case the selected applicant fails to reconfirm its commitment, the Client reserves the right to designate the next ranked Applicant as the Selected Applicant and invite for negotiations.

2.10.2 The Client will examine the CVs of all other key personnel and those not found suitable shall be replaced by the Applicant to the satisfaction of the Client.

2.10.3 The Client will not normally consider substitutions except in cases of incapacity of key personnel for reasons of health. Similarly, after award of contract the Client expects all of the proposed key personnel to be available for the entire project period. The Client will not consider substitutions during contract implementation except under exceptional circumstances up to a maximum of 1 (one) key personnel (considering equal weighting for each key personnel) and that too by only equally or better qualified and experienced personnel. During the course of providing services, substitution of key personnel would call for reduction of remuneration. The remuneration of the key personnel replaced will not exceed 80 (eighty) percent of the remuneration agreed for the Original Key personnel.

2.11. Award of contract

2.11.1 After selection, a Letter of Award (the “LOA”) will be issued, in duplicate, by the Client to the Successful Applicant and the Successful Applicant shall, within 7 (seven) days of the receipt of the LOA, sign and return the duplicate copy of the LOA in acknowledgement thereof. In the event the duplicate copy of the LOA duly signed by the Successful Applicant is not received by the stipulated date, the Client may, unless it consents to extension of time for submission thereof, appropriate the Bid Security of such Applicant as mutually agreed genuine pre-estimated loss and damage suffered by the Client on account of failure of the Successful Applicant to acknowledge the LOA, and the next highest ranking Applicant may be considered.

5. Terms of Reference

The selected consultant agency will provide consultancy services for preparation of Detailed Project report for improvement of Kakinada Anchorage Port Facilities under Sagarmala Programme.

5.1. Detailed Scope of Work

The broad scope of services is as provided below:

The Services of Reputed consultants are needed for preparation of Detailed Project Report including Detailed Soil Investigation, Topographic Survey, Bathymetry Survey Designs of the Structures, Detailed Drawings and Detailed Estimates for the works as specified below as per the standard norms and specifications.

The Broad Scope of work of Consultancy Services shall consist the following without limiting to the same:

1) Discussions with Client on study requirements, collection of available data / reports.

2) Site visit and visual inspection of existing facilities and operations at Kakinada Anchorage Port and additional data collection.

3) Traffic Projections for the Port for the next 30 years including coastal cargo.

4) Carryout complete topographic survey and hydrographic survey of the entire commercial Canal and approach channel to the sea. Topography survey area shall cover from Kumbhabhishekam temple to South groyne of the commercial canal and from Jagannaiakpur Bridge to Hope Island covering entire Anchorage Port area. The Hydrographic survey shall be carried out from the Jagannaiakpur Bridge to Hope Island at 20 Mts. X 20 Mts. grid. The survey area shall cover entire width of the Commercial Canal from Jagannaiakpur Bridge to Hope Island including Anchorage area of Kakinada Anchorage Port in the sea.

5) Conduct detailed soil investigation at the location of the wharf for Mechanical loading and loading points with required boreholes including all necessary field tests, laboratory tests duly arriving at the S.B.C. of the area for design purpose of the structures. The soil investigation shall cover six land bores at the locations as specified and decided by the Department.

6) All the surveys mentioned above shall have to be carried out in the presence of the Port Department representative.

7) Preparation of detailed designs, drawings, cost estimates for the following works as per the latest design specifications of the MORTH, BIS and IRC:

   (i) Construction of Wharf for Mechanical handling near T Shed ‘G’ in New Port area at Anchorage Port of Kakinada:

       The existing wharves which were designed for manual operations were constructed long ago and have completed their service life. Hence, it is proposed to construct new wharf near T Shed “G” for a length of 90 mts. for mechanical handling at new port area

   (ii) Construction of Loading Points in New Port area at Anchorage Port of Kakinada:
At Kakinada Anchorage Port the cargo is being handled from shore to ships and vice versa by using steel hulled hopper barges of 400 tons to 600 tons capacity. At present, there are 29 loading points for loading cargo to the barges which are not sufficient to handle the present cargo volume. Hence, to increase the handling capacity of cargo, 5 additional loading points are proposed.

(iii) Strengthening the Road by Providing C.C. Pavement in New Port area at Kakinada Anchorage Port:

Existing Port roads which provide connectivity to the Shore Area were constructed a long time ago. Heavy rains and cyclones over the years have led to pot holes/ditches across these roads. Due to increase in port activity these roads are not fit to sustain movement of heavily loaded vehicles throughout the year. Repair work has not been carried out on them since a long time.

The existing roads now consist of flexible pavement layers and are distressed beyond repair. Therefore, it is an imperative to redesign the roads with cement concrete pavements in line with NHAI standards with a view to withstand the heavy traffic.

(iv) Special repairs to existing groynes at Kakinada Anchorage Port:

To carry out trade activities for imports and exports in Kakinada Anchorage Port, the commercial canal is the vital link connecting the sea at Kakinada bay is about 61 M wide at low water level and has a depth of 2.5 M below low water and riveted on its sides. The commercial canal from the point at Jagannaickpur Bridge (canal over Road Bridge) to the tip of the AGA Lights of the South / Northern extended the groynes towards sea subsequently long back prior to the year 1970.

There is a need to strengthen the groynes & revetment by carrying out required special repairs / renewals to continue to have a trade activities through the commercial canal.

The southern Bank of Commercial Canal from Canal over bridge at Jagannaickpur to Fisheries office is badly damaged. Therefore, there is every need to construct a Diaphragm wall to control the encroachments as well as to regulate the fishing boats and cargo boats.

The Diaphragm wall is proposed to be designed for a dredge level of (−) 2.50 Mts., with top level at (+) 2.50 Mts and founding level at (−) 7.50 Mts.

The present south groyne of about 3.30 Km from Yetimoga to Aga light is badly damaged. The present cross selection adopted long back is not sufficient to withstand the Cyclonic waves. Hence, a section with a top width of 5.00 Mts with (1:1 ½) Slope with stone packing of Rough Stone. The cross section needs to be re-designed withstand the cyclonic waves. Further, North side revetment 4490 Mts., long and North groyne 936 Mts., long is badly damaged and is proposed for renovation.

(v) Renovation of Transit Sheds A to I (9 Nos) in New Port area at Anchorage Port of Kakinada:

Kakinada Anchorage Port has 9 No. of transit sheds from No. A to I with each transit shed consists of 3 compartments except transit shed D which consists of 4 compartments. At present all 9 transit sheds are in unserviceable condition as no major repair work has been done since the completion of their construction.
Hence, the existing transit sheds at Kakinada Anchorage Port needs to be renovated duly re-designing the floor level of the Transit Sheds with reference to the existing Port roads and replacing the existing A.C. Sheet roof with new roof as per latest trends in the industry.

(vi) Capital Dredging of Kakinada Anchorage Port:

For transportation of cargo from shore to ship & vice-versa, the private owned wooden cargo boats of 100 to 200 Tons capacity utilized earlier were subsequently replaced with ~ 100 Nos. steel dumb cargo barges having the capacity of 350 to 450 tons. Customers have expressed their desire for introduction of higher capacity cargo barges of upto 1,000 tons. This would not only save time in loading / unloading operations per given volume, but also minimize the transportation charges.

The 70 meters wide commercial canal which is the vital link between the port and Kakinada bay has depth varying between (-) 1.0 to (-) 1.5 meters as against the desired depth of (-) 2.5 meters which is required to be dredged and maintained.

The plan for Kakinada Anchorage Port is provided below:

![Kakinada Anchorage Port Plan](image)

economic feasibility of the Project including computation of Project IRR. Economic and financial analyses of the works and recommendations on preferred mode for implementation
